

Did you know you could get paid for planting ArborGen seedlings for conservation, including carbon sequestration?

The USDA Forest Service is investing nearly \$145 million to put forest landowners and emerging carbon markets together.

ArborGen

1

STEP ONE

Contact your local ArborGen Reforestation Advisor to get started.

2

STEP TWO

Contact a professional forester to produce a Forest Management Plan. If you don't know a professional forester, your ArborGen Reforestation Advisor can assist in connecting you to one.

3

STEP THREE

Familiarize yourself with the documentation needed by the NRCS to complete the application for your state. *Dates will differ from state to state.*

4

STEP FOUR

Once your application has been approved, work with your Reforestation Advisor to reserve your ArborGen advanced genetic seedlings. *Many state programs require advanced genetics for carbon sequestration programs. ArborGen's MCP® leads the forest industry in carbon capture.*

Monies for the Conservation Stewardship Program (CSP) are awarded on October 1st and cover seedling purchase as well as forestry activities including:

- ✓ Herbicide application
- ✓ Fire breaks
- ✓ Mechanical site prep

- ✓ Planting
- ✓ Prescribed burning
